

Martin Reed

ENTRY LEVEL FULL STACK WEB DEVELOPER

ABOUT ME & TECHNICAL SKILLS:

Over a course of a few months, I've developed my computer skills and have become quite the computer geek. I am excited to start on this new adventure and I look forward to a journey of 'Happy Coding'!

I recently graduated at Hyperion Development as a Full Stack Web Developer.

I have worked extensively with languages that include HTML, CSS & JavaScript along with other frameworks and libraries such as React, Node.js, Express & Next.js.

I've also worked with database technologies like MongoDB.

I have chosen to do a career change to something that really challenges me and offers a greater opportunity to develop my skills.

I feel confident that I'll be a great asset to any company I join.

I meet all the professional prerequisites of being a team player, go getter and punctual at all times.
